- **Niche areas targeted NDDS & PFIs, Herbal Specialities Cosmetics, Contrast Media & Diagnostics.**

UNIJULES®
LIFE SCIENCES LTD.

A success story emerging from Determination, Adaptability & Spirit of Innovation

The Pharmaceutical sector is one where trends and technologies are in a state of flux. New breakthroughs in the world and Healthcare occur at a hectic pace. This demands for expertise and skill to stay ahead.

Unijules Life Sciences Ltd. exemplifies an organisation displaying these very traits.

Headquartered and set-up in the industrial belt of Nagpur City of Central India, **UNIJULES** has established itself as one of the preferred healthcare solution providers in the field of New Drug Delivery Systems (NDDS) while keeping its grass roots expertise like Mother Tinctures, classical herbals alive offering time tested benefits to the common man.

The Group Companies of **UNIJULES** are supported by excellent technical team & sufficient capacity to produce large requirements for different market segments.
UNIJULES Group Companies are engaged in the activities of ...

- Manufacturing, Distribution and Marketing of Allopathic and Herbal for Human and Veterinary consumption.
- Product lines include all dosage forms (Solids, Liquids, Semisolids, Powder, Parenterals).
- Organic Cultivation of in house phytochemicals and extraction facility.

UNIJULES has pioneered several innovative technologies & products particularly in the spheres of Pellets, Multiplets, Resinates, and Herbals & Diagnostics. Multiparticulates & Modified Release Oral Solid Dosage Forms have been identified as a thrust area & key formulations developed. Taste masking and ORO dispersible products are focus areas.

The wide appreciation for its quality and prompt services to clients, have ensured a strong presence in both domestic and international markets.

OUR MISSION

OUR VISION

UNIJULES®
LIFE SCIENCES LTD.

Value Driven Culture

Our value provide the safety **STRAP** for associates on board our fight to success.

Our Corporate philosophy which percolates through the entire organisation and forms the core can be explained in the following terms:

- **Striving** for Customer Satisfaction through all our actions.
- **Transacting** Business with Integrity & Transparency.
- **Respecting** the Rights of all Stake- holders & Associates.
- **Aspiring** for a responsible corporate citizenship through our regard for environment, promotion of education, and contribution towards disease - free humanity in constant harmony and peace.
- **Pursuing** Excellence Through Continuous Innovation.

This distinguishes **UNIJULES** amongst other technology companies, enabling us to excel and innovate in what we do and in what we stand for as a company.

All these connote the **clarity of purpose** & sense of **commitment** that have lead each one at **UNIJULES** to evolve as a **true professional & global citizen.**

Our Mission

We will exploit our Zeal for excellence and spirit of innovation in the field of medicine to ensure our position as a premier pharmaceutical manufacturing organisation specialising in..

- Niche products and markets
- Original research based herbals for chronic ailments.
- Biotechnology based products and processes.
- Thereby contributing to availability of high quality **AFFORDABLE HEALTHCARE** for the common man and meeting our obligation to our employees, investors and the shareholders.

Our Vision

We believe that the pharmaceutical business is today poised for a great leap forward. Truly innovative technologies with the potential to change the nature of human health and longevity have already appeared and each day brings better and better innovations. At the same time, the fruits of these discoveries are becoming prohibitively unaffordable for the majority of the human race. **There is a desperate need for solutions that emerge out of these innovative technologies to reach the common man at an affordable cost so that these benefits do not remain accessible only to the rich and affluent sections of society.**

Ever changing regulatory guidelines, advance in drug therapy and delivery systems, drug industry mergers aquisitions, globalisation and evolving markets such as those for nutritional supplements, old age and alternative therapy medicines pose challenges to every pharmaceutical organisation to manage and accelerate the drug development process.

We, at UNIJULES, aspire to play a significant role in making the fruits of such technologies available as affordable healthcare solutions, teaming with like-minded associates in the pharmaceutical technology business, aiming for customer satisfaction, while respecting the rights of others.

Uniquely positioned to provide & expertised in new drug delivery systems, we support our own and customers objectives with specialised formulations to reach the market faster and easier than ever.

We are committed towards providing our national and international clients an easy and timely access to sophisticated process technologies and products, give value for money and to offer our customer innovative and exclusive quality products that differentiate them from their competitors and significantly impacts their bottom line.

That's why, every day we continue to put our zeal for excellence and spirit of innovation into all our actions.

RESEARCH AND DEVELOPMENT

Technical Services Departments

(Quality Assurance & Control)

"Creating world class manufacturing facilities is easy, running them daily and continuously as per GMP norms is a way of life at UNIJULES."

Business Development and Logistics

"Customer satisfaction through accurate understanding of needs and Schedules and all round service."

UNIJULES®
LIFE SCIENCES LTD.

Research and Development:

1. Formulation development will continue to be the bench mark of success at the newly upgraded R&D facility. Unique and tricky formulations have already been identified for development.

2. The benefits derived are
   - Being unique, the margins are much above the industry standards.
   - Since very few players, helps in commercialization of common products thus tying up capacities and bringing in the required job work equivalent.
   - Cost cutting by changing formulations.
   - Generation of stability data.
   - International recognition as quality service provider.

3. Future Plan of Action
   - Development of New technologies like mouth dissolve, gels with better penetration and safe disinfectants.
   - Major thrusts towards preventive medication health solutions.
   - New plants to replace existing capacities in Herbals and Parenterals.
